

Projection system Werklicht-Pro

Technical data

Projection range	60° (up to 80° with reduced precision)
Measuring distance	approx. 6-8 m
Projection accuracy	± 0.5 mm in 4 m
Laser protection class	2M (visible green laser)
Laser line	<1 mm in 4 m

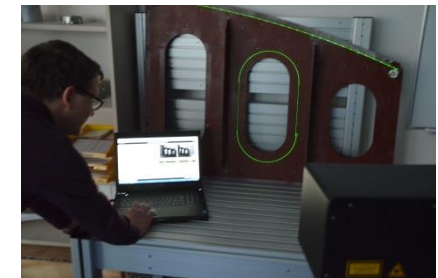

Marking of the waterline and monitoring of hull openings

Projection system Werklicht-Pro

Fields of use / applications

- Use in the internal fitting out of ships, e.g.:
 - Positioning of parts
 - Setting of pass-throughs
 - Collision checking
- Quality control
- Application of labelling and patterns onto objects without using gluing templates
- Transfer of installation and assembly instructions to the real object

System configuration in use
