

Mobile 3D factory planning with visTable touch®

System

- Mobile PC rack with 55" display
- Multi-touch capable
- Graphics PC with Nvidia Quadro graphics card
- Software for 2D and 3D factory planning

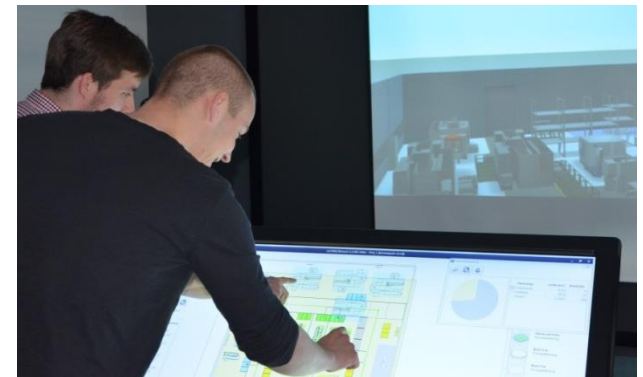

Scope of functions

- 2D and 3D factory planning
- 3D visualization of facilities and structures
- Analysis and optimisation of material flows
- Layout optimisation
- Collision checking for facilities and structures
- Open model library

Fields of use / application

- Factory planning
- Digital factory
- Plant and layout planning
- Material flow analysis
- Optimisation of logistics processes
- Scenario planning
- Routing optimisation

Joint planning in 2D and 3D at Fraunhofer AGP
